To Whom It May Concern:

This is a letter of recommendation for James Goethe and his services supplied through his company Hypercube Technologies. I use quick books for all my accounting work at my office. Like most people I do not always save the program. In 2003 my computer crashed. I had four years of data in the program. I had not saved the program for six months. The first computer consultant told me that there was nothing I could do. Then a friend of mine referred me to James for second opinion. He was able to salvage all my programs that I had lost. This saved me thousands of dollars and hours of aggravation. I have continued to use James for my entire computer needs. He has networked our computers and consulted me with every computer issue that I have had. Our office depends heavily on our medical program to be up and running at all times. Whenever there is a problem we have always called James. He and his staff have always been able to fix the problem in a timely manner. I have complete confidence in his work and highly recommend him. Please feel free to contact me if you have any questions.

Sincerely,

Dr. Steven Bovio
