To Whom It May Concern:

We are pleased to write a letter of recommendation for Hypercube Technologies.

Our organization is a large non profit serving over 1200 children in multiple site locations throughout Sarasota County. Hypercube has been involved in virtually all aspects of our computer, network, and telecommunications systems for the past year. We are housed in an older building with a system that has been pieced together by several different groups over the years. Needless to say, we have significant challenges.

The Hypercube staff has proven to be both knowledgeable and responsive to our needs. There people are always courteous, dependable, and willing to go the extra mile to solve our problems. Their response time is excellent and they stay until the job is done.

Please feel free to call us if we can provide any additional information about this excellent service organization.

Sincerely,

Jim Shirley
Director of Development, PAL
